

**The Problem:**  
Your pet will not accept the medicine prescribed.

**The Solution?**  
Custom Veterinary Compounding!

Alvarado Pharmacists are creative! We can help you find a dosage form for your dog, cat, bird, "pocket pet", or even an exotic.

**Need a "different" dosage form? Look at these!**

- Flavored oral solutions and suspensions
- Unique oral gels and pastes
- Chewable, flavored treats
- Topical creams, ointments, and lotions
- Transdermal delivery systems
- Sterile injections
- Ophthalmic preparations
- Sugar-free formulations
- Much, much more

**Hard To Find Medications**

Sometimes a commercial medication you need is no longer available. What will you do?

**Just call us!**

Many times, Alvarado Pharmacists can re-create a discontinued medication. We can even put that formula into a different dose form if that's what the pet needs.

**Phenylpropanolamine?  
Or "Isuprel" for collapsed trachea? We have those!**

Yes, we have PPA for you. And "Isuprel" elixer, too. An Alvarado Pharmacist has recreated this formula. It really works to curb the collapsed trachea syndrome in small animals. "Isuprel" was removed years ago.

So, what do you do if needed medicines are no longer available?. The vet only has to call us. Alvarado Pharmacy has resources to find those missing formulas.

**Pick A Flavor!**

Animals appreciate - and even demand - good tastes . . . just like us! Alvarado Pharmacists can flavor any medication so the animal will accept it. Our large taste selection assures a flavor for any pet.

**The Right Dose Size**

Some manufactured medicines only come one way. Or in strengths not suitable for all animals. We know that "one size does not fit all."

Need a concentrated dosage for a pocket pet or bird? Or a smaller increment for a larger animal?

We create "pet friendly" dose sizes to assure animal acceptance. This is a benefit to pet owner and veterinarian alike.

**Remember. . .**  
Alvarado Pharmacists **create** "pet friendly" dose forms.

# We Can Help The Vet (and pet) With . . .

- Unique, flavored dosage forms that make it easy to medicate a pet, like -
- Chocolate/peanut butter suspension for Ferret hyperinsulinism or -
- A stool softener in beef-flavored gelatin balls for a constipated cat, or -
- Great tasting antibiotic suspensions with a large variety of flavor options.
- Precise, customized medications for seizures, diabetes, hyperthyroidism
- Antidotes and treatments for accidental animal poisoning
- Vitamins and tonics flavored to suit any animal
- Transdermal NSAIDs to prevent stomach and bowel upset or irritation
- Protective medicated coatings for wounds or stitches
- Transdermal motion sickness medicines for your traveling pets
- Concentrated dose forms for birds, reptiles, and larger animals
- Injections prepared under sterile conditions
- Much, much more.

**Remember:**  
Alvarado Pharmacists *create*  
“pet friendly” dose forms.

“Working together to  
help the pet”
